33	3(j)	This problem is not appropriate here. Change to: $88 - 8 \times 6 \div 3 - 80 \div 8 \times 7$ Answer: 2	2008
96	12.	The second line under the image should be: $\frac{3}{4} \div \frac{3}{8} = 2$	
133	26(b)	The height should be labeled rather than the side of the triangle.

21	Unit 1, Ch. 5 Test A	12	This answer can be estimated in various ways. The exact answer is \$60,490,000. Accept answers within 20 million of this answer. For example: Round to \$500,000 and 120 to get the estimated answer of \$60,000,000 which is the answer in the answer key. Or round to \$500,000 and 100 to get the estimated answer of \$50,000,000. (Note: There is no exact answer to a problem asking for an estimated answer. There are no hard and fast rules for how to round the numbers. Students should round to numbers that are easy for them to calculate with. Some students are better at mental math than others and might round in such a way that the estimated answer is closer to the exact answer. The simplest calculation occurs when rounding all numbers to a number with only one non-zero digit, but rounding to a number with 2 non-zero digits, such as 120, does not give an <i>incorrect</i> estimate compared to rounding to 100 instead.)	2008
21		13	This answer can be estimated in various ways. The exact answer is \$260,880. Accept answers within 100,000 of this answer. For example: Round to 2200 members paying \$100 a year, estimate is \$220,000. Round to 2000 members paying \$120 a year, estimate is \$240,000. Round to 2000 members paying \$100 a year, estimate is \$200,000.	2008
35	Unit 1 Cum. Test B	13	Change to: Which of the following is a prime number	2008
120	Unit 4, Ch. 1 Test A	9	Change last sentence to: What fraction of her stamps did she have left?	2008
125	Unit 4, Ch. 2 Test A	7	Change second sentence to: He spent $\frac{1}{2}$ as much on the chair as he did on the table .	2008
128	Unit 4, Ch. 2 Test B	8	The correct answer is 65. As that is not one of the choices, change the last sentence to read: When she has finished baking all the tarts, how many tarts will she have baked?	2008
148	Unit 4, Ch. 5 Test A	9	Wording is confusing. Also, milliliters would not be used for a tank; the capacity of this "tank" is only 175 ml. Change units to liters. A tank was filled to $\frac{2}{7}$ of its capacity. Tricia added 90 liters of water to fill the tank to $\frac{4}{5}$ of its capacity. How many more liters of water are needed to fill the tank completely?	
150	Unit 4, Ch. 5 Test B	4	Change last sentence to: How many grams in all of cornflakes are needed to fill the container completely? (correct answer is D, 400 g)	2008
151	Unit 4, Ch. 5 Test B	10	The correct answer to the problem as stated is 12. To change the problem to get the answer A (15) change the last sentence to: How many other colors of hairpins does she have?	2008
184	Unit 5, Ch. 3 Test A	6	The letter O should be moved to the left to the intersection of the solid lines, not the dotted lines.	2008
	Answers			2008
256	Unit 1, Ch. 5 Test A	12	\$50,000,000 is also acceptable. Answers can vary; see comment for p. 21 above.	2008
		13	Answers should be around \$260,000.	2008
256	Unit 1, Cum. Test B	12	C	
260	Unit 4, Ch. 5 Test A	9	35 liters (if problem is changed as suggested above)	2008

260	Unit 4, Ch 5 Test B	4	D	
262	Units 1-6 Test B	13	B	2008
